

AGTOS®

Service for wheelblasting machines

- Blast machines
- Second-hand machines
- Conveyor systems
- Service and spare parts

Turbine replacement parts for a variety of manufacturers

Maintain the value of your blasting machines

Maintaining blasting machines poses particular challenges for users. The abrasive effect of the blasting media can quickly lead to severe damage to machines.

It is important to us that your machines keep running. That is why we offer different services that help you with your daily work. Our localized sales organization with long-term partners ensures quick communication.

Experienced in-house and field technicians answer questions and solve problems. You receive the best possible support due to the combination of knowledgeable office staff and flexible service technicians.

Learn more about the **AGTOS** service concept.

Professional blasting machine maintenance and repair

In addition to turbine parts, we also provide filter cartridges, new dedusting and sealing brushes and customized rubber and manganese blanks for several types of machines.

Quick processing of your orders and a smooth transfer to the warehouse ensures fast and professional shipment of ordered items.

Remote assistance

Consulting

→ Replacement parts

Replacement and wear and tear parts for wheelblasting machines from a variety of manufacturers are available from stock. Our delivery service works quickly and reliably.

→ Modernization

Your blasting machines have to grow with you and must therefore fulfill the current requirements. We will gladly show you your options. This way, new investments can be better planned and your existing investments can be better utilized.

→ Remote maintenance

If an Internet connection is available, we are happy to troubleshoot online.

→ Maintenance agreement

Make a significant contribution toward maintaining the value of your blasting machines and systems by concluding a maintenance agreement. Based on the intensity of use of the blasting machines, our skilled technicians come and check all of the modules and draft a report with a specifications list and instructions for further actions. Many customers see this as a sensible supplement to, or as a replacement of their own maintenance activities.

→ Repair

Our installation technicians have experience in repairing wheelblasting machines from several manufacturers. The necessary replacement and wear and tear parts are often available from stock.

→ Inspection

Wheelblasting machines from our factory and other manufacturers are professionally inspected. The results along with recommendations for further actions are provided to our customers in an easy to understand form.

→ Consultation

Information about options for designing or optimizing the blasting process are essential for the operator. To this end, we have a tight sales network consisting of commercial agencies, sales partners, service technicians and, last but not least, sales agents and sales engineers. Thus, we are able to offer detailed solutions and concept solutions for complex tasks. A competent consulting team is also available to you in-house as part of our service.

A strong team

Replacement and wear and tear parts, consultation, inspections, repairs, (remote) maintenance and modernizations/services – our service is fast and competent.

Service hotline

You will receive a telephone number that allows you to contact a competent person from our company outside of usual business hours.
